

Fast, accurate, easy to use and easy to transport multifunction mobile pallet scale. It speeds up the weighing operations of any product packed on europallet (800x1200 mm): to weigh it is not necessary to leave the scale with the pallet truck, just lower it by simply resting the pallet on the U-shaped structure. The wheels and transport handles are standard, allowing the scale to be moved and used immediately to the place where it is to be weighed. Also available in CE APPROVED versions.
